- The milk or milk ingredient of which this product is made has been derived from a country and a herd officially free of foot and mouth disease, rinderpest and contagious bovine pleuropneumonia and free of other diseases mentioned in list A of the OIE transmissible to the given species;
- The area within a radius of 10 kms from the place, where the manufacturer of the above mentioned product is situated, has been free of foot and mouth disease and free of other diseases mentioned in list A of the OIE transmissible to the given species during the last thirty (30) days.
- No case of foot and mouth disease has occurred in the Netherland during the last 6 (six) months;
- The agent causing Bovine Spongiform Encephalopathy (BSE or also called Mad Cow Disease) has never been detected in milk and there is not any scientific doubt about the absence of BSE in milk and therefore the mentioned product(s) is/are regarded as free of BSE and in this respect completely safe for human consumption;
- The milk or milk ingredient of which this products is made has been heated at a temperature of not less than 72 °C for at least 15 seconds in order to avoid the presence of vegative pathogenic micro-organisms;
- The product is fit for human consumption;
- That the product has been packed in new containers;
- The manufacturing processes as well as the resulting products are under regular control of the competent authorities for the hygienic and bacteriological requirements, including the control on the presence of Salmonella and other pathogenic micro-organisms associated with milk, mentioned in Directive 92/46/EEC;
- Every precaution was taken to avoid contamination of the products after processing;
