

## DSM KALTIM Melamine rewarded for excellent safety record

June 16 2003 saw DSM KALTIM Melamine pass the 2500-day landmark of zero lost time accidents dating back to August 10 1996 (the mechanical completion of DKM Project). This commendable performance has been recognised at the highest level.

On January 12, Mrs. Megawati Soekarnoputri, President of the Republic of Indonesia, acknowledged DSM KALTIM Melamine's excellent safety record with a special Zero Accident award. The award is made each year between January 12 and February 12, designated Safety Campaign Month in Indonesia. Only companies with an outstanding safety record receive this award which Jan Maarten Bosch, General Manager at DSM KALTIM Melamine, was privileged to accept on behalf of the entire workforce.

Jan Maarten Bosch receives safety award from President Megawati Soekarnoputri

DKM holds its own Month of Safety Campaign (Bulan Kampanye K3) during the corresponding period every year. "The purpose of this event is to remind everyone about the importance of safety but also to socialise the safety programme both for employees and their families," said SHE Manager Nur Sahid.
