## **DSM RONOZYME<sup>®</sup> ProAct receives INNOV'SPACE award from SPACE 2010**

SPACE, the international trade fair for livestock in Rennes, France, is presenting DSM Nutritional Products with the 2010 INNOV'SPACE award. The distinction is in recognition of the innovative protease RONOZYME<sup>®</sup> ProAct. RONOZYME<sup>®</sup> ProAct was successfully launched earlier this year in the European Union.

In its constant search for innovation and improved feed utilization, DSM Nutritional Products has developed the pure protease RONOZYME<sup>®</sup> ProAct – a feed enzyme that once again brings added value for all those involved in the broiler industry.

*“RONOZYME<sup>®</sup> ProAct reduces feed costs by maximizing protein use and improving the nutritional value of broiler feed,”* comments Stephanie Beaulieu, European Feed Enzyme Category Manager at DSM Nutritional Products. *“Depending on local grain prices, the producer can save EUR 2–6 per ton of chicken feed by using RONOZYME<sup>®</sup> ProAct. This innovative product unlocks the nutritional value of a large variety of feed proteins by complementing the activity of digestive enzymes such as pepsin and pancreatic proteases.”*

Besides its attractive financial benefits, RONOZYME<sup>®</sup> ProAct also offers a clear environmental advantage. By increasing the digestibility of proteins, it reduces emissions of ammonia and other nitrogen compounds into the environment, thereby lessening the environmental impact of animal production.

**The DSM team is looking forward to meeting you at their stand to present RONOZYME<sup>®</sup> ProAct: Hall 9, aisle A, stand A12**
