### **Integrated Services from DSM Pharmaceutical Products**

(Parsippany, NJ – May 2, 2006)

DSM Pharmaceutical Products has announced the integration of their custom manufacturing service offerings for pharmaceutical and biopharmaceutical customers.

DSM Pharmaceutical Products capitalizes on the synergies and strengths of each of its business units to provide integrated solutions for both primary and secondary manufacturing. Previously, DSM Pharmaceutical Products comprised of three business units - DSM Pharmaceuticals Inc., DSM Pharma Chemicals and DSM Biologics - marketed each business unit's services separately. A new comprehensive service brochure and video demonstrates how DSM provides custom contract manufacturing services to pharmaceutical and biopharmaceutical customers from start to finish. According to Terry Novak, Chief Marketing Officer, DSM Pharmaceutical Products, "Many customers have already benefited from this integrated approach by being able to bring their products to the market more quickly and by having only one key point of contact throughout the development and manufacturing process. There is no other company that offers such a breadth of services from starting materials to finished dosage forms."

DSM Pharmaceutical Products has custom manufacturing and development capabilities that cover the complete spectrum from process development of small and large molecule APIs and intermediates to solid, semi-solid and sterile finished dosage forms.

### **About DSM Pharmaceutical Products**

DSM Pharmaceutical Products is a global provider of high quality custom contract manufacturing services to the pharmaceutical and biopharmaceutical industries. DSM Pharmaceutical Products provides contract manufacturing services including: advanced intermediates, active ingredients (API's), amino acids and derivatives, mammalian cell culture production (fed-batch and perfusion) of monoclonal antibodies, proteins, vaccines, finished dose manufacturing of solid dose, scheduled drugs, liquids, aseptic liquid and lyophilized products.

From clinical to commercial services, DSM focuses the right resources on providing the highest level of service and quality while applying innovative solutions to satisfy customers' unique manufacturing needs.

### **About DSM**

DSM is active worldwide in nutritional and pharma ingredients, performance materials and industrial chemicals. The company creates innovative products and services that help improve the quality of life. DSM's products are used in a wide range of end markets and applications such as human and animal nutrition and

health, cosmetics, pharmaceuticals, automotive and transport, coatings, housing and electrics & electronics (E&E). DSM's strategy, named Vision 2010 – Building on Strengths, focuses on accelerating profitable and innovative growth of the company's specialties portfolio. Market-driven growth, innovation and increased presence in emerging economies are key drivers of this strategy. The group has annual sales of approximately EUR 8 billion and employs around 22,000 people worldwide. DSM ranks among the global leaders in many of its fields. The company is headquartered in the Netherlands, with locations in Europe, Asia and the Americas. More information about DSM can be found at [www.dsm.com](http://www.dsm.com).
