

# Case Study

# Riverboat Casino

## The Challenge

A busy riverboat casino needed its concrete floor areas, including a cafeteria, hallway and surveillance area, coated with a product that minimized down time and would not negatively impact business with unpleasant odors. The casino is open 24 hours a day, 7 days a week.

### Specific needs:

- No disruption to business operations while coating a main corridor that must be accessed every 30 minutes
- Low odor product that posed no health risk to customers or employees, since the casino would remain open during installation
- No need for special air ventilation
- The coving needed to be coated

## The Solution

UVolve® Instant Floor Coatings was selected for this project for the following reasons:

- UVolve® is easily applied and cures instantly via the use of UV equipment, allowing for immediate return to full operations.
- UVolve® has a very mild odor and near-zero VOC (Volatile Organic Content) emissions
- UVolve® requires no special air monitoring

## The Result

UVolve® was able to be installed quickly, with no down time for dry time needed. Due to the low odor, the casino's guests were not even aware of the installation and business continued to operate smoothly. UVolve® Instant Floor Coatings provided the sole solution for this challenge.

## Project Scope

**Industry:** Riverboat Casino

**Location:** Illinois, USA

**Application:** 1,200 square feet

**Substrate:** Concrete

**System:** UVolve® Vivid System

**DSM Functional Materials  
Floor Coatings Group**
