How does nutrition lay a foundation for immune and vaccine responses?

Good nutrition supplies building blocks of a healthy immune system. Both macro- and micronutrients have a part to play in optimizing immune function and helping the body to fight infections.1,2 In response to growing interest in immunity and vaccines, here we explore the latest science and the opportunities for innovation within the dietary supplements and immunity space.

How can supplementation help?

Dietary supplements are a safe, effective way to complement a balanced, diversified diet and help support a healthy immune response to vaccines. With immunity a top concern for 60% of consumers and 43% worried about resistance to epidemic diseases specifically,10 there is an opportunity to develop appealing supplements that help support the immune system and address consumer health concerns.

EXPERT WEBINAR:
Thursday, May 20th, 2021

DSM and renowned nutritional immunology expert, Prof. Philip Calder, held a live panel discussion on the role of optimal nutrient status in laying the foundation for a robust immune response.
