

# Premix Solutions for targeted medical nutrition products

## DSM, your ideal partner for customized consumer-centric medical nutrition solutions

- **Purpose-led, science-backed;** our medical nutrition experts take a rigorous evidence-based approach to deliver effective solutions.
- **Consumer centric;** we use insights from our proprietary researches to develop innovative condition-specific concepts that meet the special needs of different elderly and patient groups.
- **Deep know-how;** superior operations and largest premix footprint help streamline your business and accelerate go-to-market.

### DSM Medical Nutrition APAC

**380+** medical nutrition formulations

**35+** specialist team

**4** premix plants  
(Malaysia, Singapore, India, and New Zealand)

## 1 End-to-end partner with unrivalled expertise and service offering

**12,000 ton**  
of premix produced annually

**1,500+**  
unique premix formulations

- Industry leader in health and nutrition premixes deliver efficiencies and economies of scale.
- Proven track-record of manufacturing highly technical premix matrix into customized formulations. Our capabilities include the blending of complex nutrient and mineral mixes, managing highly hydroscopic materials (e.g. MgCl) end-to-end, plus balancing finished product mineral contribution alongside sensory requirements.
- Deep expertise and established formulation library enable fast turnaround in formulation and sample development processes.

## 2 Consistent and reliable supply for our customers

**2,000+**  
premix ingredient portfolio

**20–5,000kg**  
batch sizes available

- Backward integration with the DSM portfolio of vitamins, nutritional lipids, carotenoids and other actives.
- Global sourcing & strong supplier network assures the best access to 3rd party actives and ingredients.
- Agile production network including 10 blender types across 15 sites provides best-in-class flexibility to produce small and large batches according to customer needs.

### 3 Industry-defining quality standards

- Stringent ingredient qualification process for all premix components supported by Global Quality communities & Regulatory experts for APAC markets
- All sites are quality assured, and specific sites provide differentiation certificates
- Most extensive analytical test services and provision of Certificates of Analysis (COAs) for all premixes

#### Quality certificates

- ISO 9001:2015 (SGS)
- FSSC 22000 ver. 5.1 (SGS)
- RSPO Supply Chain (agroVet)
- SEDEX registered
- HACCP plan
- Halal certification

### 4 Value-added services and partnership

- Access to expert formulation advice, fast prototyping that reduces complexity, saving you valuable time and resources in product development.
- Powerful co-branding and trademark licensing opportunities, e.g. Quali®-Blends logo.
