BRIGHT SCIENCE. BRIGHTER LIVING.

Vitamin D supports a healthy immune system

Although vitamin D is most known for its effects on bone and muscle health, there is emerging evidence that vitamin D plays a crucial role in immunity.

Nutrition plays a key role in maintaining a healthy immune system. Scientific studies show sufficient vitamin D levels are linked to the reduced risk of infections such as acute respiratory infections. An increasing body of evidence suggests vitamin D is linked to reduced risk, duration and severity of COVID-19 infection.

Relative Risk of Respiratory Tract Infections with Vitamin D and Without Vitamin D

The sunshine vitamin: Why it's hard to get enough vitamin D

Vitamin D is produced when our skin is exposed to sunlight. That's how we get up to 90% of our vitamin D. In winter, especially, it can be a challenge to get enough. Other factors that limit vitamin D production in the body include age, indoor lifestyles, sun protection, and darker skin tone.

Few foods naturally provide the vitamin D we need. With fortified foods and regular dietary supplements it can take months to build up vitamin D levels and be effective.

88% of the world's population has sub-optimal vitamin D levels (<75 nmol/L)^{1,2}

Consumers associate vitamin D with immunity benefits

Consumers are increasingly understanding the connection between vitamin D and immunity. They are showing high interest in vitamin D, particularly following the endorsement by leading scientists and KOLs such as, NIAID Director Dr. Anthony Fauci.

Vitamin D Supplementation Could Prevent and Treat Influenza, Coronavirus, and Pneumonia Infections

ampli-D® is a 3x faster and more effective form of vitamin D

Vitamin D supports a healthy immune system

🔄 Normally, it can take months for the body to reach optimal vitamin D levels →

Vitamin D3 from ordinary supplements or fortified foods, needs to be processed by the liver and converted into calcifediol, before further use. This is a slow process, thus it can take months to reach optimal vitamin D levels.

How ampli-D® works 3x faster than vitamin D*

Calcifediol is the most common form of vitamin D in the body. It is also the more bioavailable vitamin D form, hence better absorbed by the body. This helps in reaching optimal vitamin D levels faster. ampli-D® is DSM's calcifediol product, clinically proven to optimize vitamin D status 3x more quickly than ordinary vitamin D.^{1,2,3}

* Clinical studies show that sufficient vitamin D status is achieved on average 3 times faster and more effectively compared to vitamin D3 on an equal dose basis.

ampli-D® is the faster, more effective form of vitamin D

Our bodies can get vitamin D from food, supplements and sunlight. Before this can be used further by the body, it must be processed by the liver and converted into calcifediol. It's a slow process that can easily take several months to achieve a healthy vitamin D level in the bloodstream.

ampli-D® is already in calcifediol form. That means it's immediately available to be further activated and used by the body. ampli-D® raises vitamin D levels 3x faster than regular vitamin D*.

Optimal levels are reached faster

Many clinical studies have shown that ampli-D® boosts blood vitamin D levels more effectively than conventional vitamin D3. Moreover, you are more likely to achieve optimal vitamin D levels with ampli-D® than with vitamin D3 in just weeks instead of months.

Chart right
Graeff-Armas J Nutr 2020
Optimal levels vitamin D reached faster with calcifediol compared to regular vitamin D3

* Clinical studies show that sufficient Vitamin D status is achieved on average 3 times faster and more effectively using ampli-D® compared to vitamin D3 on an equal dose basis

ampli-D® differentiates your supplements in a crowded vitamin D market*

Comparative Claims*

- Faster and more reliable form of vitamin D
- Fast-acting form of vitamin D
- (3x) More effective/efficient at raising vitamin D levels
- (3x) Faster form of vitamin D
- (3X) Faster and more effective form of vitamin D
- Raises vitamin D levels faster
- Achieves optimal vitamin D levels faster
- More bioavailable form of vitamin D
- More metabolically available form of vitamin D
- More effective form of vitamin D
- More effectively raises vitamin D Levels
- More reliably raises vitamin D levels
- More effectively/efficiently raises vitamin D levels

Mechanic Claims

- Directly raises your vitamin D levels/vitamin D status
- Immediately available for your body to begin using
- Naturally produced in the body
- The form of vitamin D that circulates in the body
- Does not need to be metabolized by the liver

Consumer friendly

Kosher Vegetarian Halal

Product details & benefits

- Produced in US and Switzerland to the highest of quality standards
- 2-year shelf life
- Application and stability data in multivitamins, calcium plus vitamin D combinations and high potency tablets
- Strong patent portfolio
- Strong evidence from over 15 human studies
- Product and samples available upon request

* Clinical studies show that sufficient Vitamin D status is achieved on average 3 times faster and more effectively using ampli-D® compared to vitamin D3 on an equal dose basis

YOUR END-TO-END PARTNER

PRODUCTS CUSTOMIZED SOLUTIONS EXPERT SERVICES

It takes more than ingredients to launch innovative products. It takes an end-to-end partner to support you at every stage of your product development process.

From consumer insights to market ready solutions, DSM can co-innovate with you to bring new and innovative products, getting you to market faster. Learn how we can deliver ampli-D® as a market-ready solution today. PartnerWithDSM.com

Market-ready solutions backed by science

DSM is already spearheading purpose-led innovation in the field of immunity. Its calcifediol product – ampli-D® – will soon be available on retail shelves in Australia, with other global markets to follow over the course of this year. ampli-D® brings all the benefits of vitamin D, but is three times faster and more effective at raising vitamin D levels than traditional supplements*. This latest development is yet another example of DSM's evolved strategic direction in human nutrition and health as an end-to-end partner. By delivering as a market-ready solution, DSM has been able to accelerate speed to market, which is especially important during these times.

Floor Saris, Director Market-ready Solutions says: "Through our Products with Purpose strategy we are identifying real global health concerns and are working to develop industry-leading nutritional solutions, to support specific health areas - including immunity."

We continue to invest heavily in the immunity field and I'm proud to see how quickly we can bring innovative, purpose-led market-ready solutions to our customers that will support the health of individuals globally."

By championing the purpose behind the products, DSM and its partners are helping to solve the world's greatest nutritional challenges and keep the growing global population healthy. As a reliable, end-to-end, innovation partner, DSM offers a broad portfolio of science-backed products and customized solutions, powered by expert services, so that it can support customers across the entire product life cycle, from concept to consumer.
