

Somos[®] 9120 Take action

No matter your industry Somos[®] 9120 provides the ultimate solution for form, fit and function with parts that are semi-flexible.

- ⊕ Excellent flexibility
- ⊕ Superior strength
- ⊕ Outstanding durability

The need for movable parts is a constant when it comes to prototyping. Being able to ensure the proper fit for parts within a component can save both time and money.

Somos[®] 9120 creates semi-transparent parts that can allow you to see the inner working of parts you are creating. You can count on this material to simplify processes, such as in wiring and cable projects for electronic or automotive applications.

Ideal for a variety of applications

Somos[®] 9120 helps our customers produce more functional prototype parts than those made with standard SL resins. They are ideal for a variety of applications including:

- Automotive Housings
- Electronic Covers
- Consumer Packaged Goods

Solutions for many industries

Regardless of what industry you're in, new product developers rely on high-performance prototypes to test their design concepts. As a world leader in stereolithography material innovation, DSM has a Somos® solution for just about any industry. Somos® 9120 helps our customers produce functional prototype parts. It is perfect for:

Aerospace

Automotive

Consumer Goods

Design

Industrial

Motorsports

Why Somos® Materials?

DSM is a global stereolithography materials provider committed to helping our clients design whatever their imaginations can create. Through collaborative partnerships and groundbreaking materials innovation, we're pushing the boundaries of possibilities to deliver brighter lives for generations to come.

Since the late 1980s, DSM's Somos® group has earned a global reputation for stereolithography material innovation. Prototypes made from Somos® resins closely replicate the functionality of engineered thermoplastics, but are delivered with increased speed and accuracy.

We are continually advancing the performance benefits of our extensive line of Somos® materials. You'll find a solution for just about any stereolithography application.
