

Somos® NeXt

The best of both worlds

DSM's game-changing Somos® NeXt material provides the accuracy of stereolithography with the look, feel and performance of a thermoplastic. **It's a true win-win for our customers.**

- ⊕ Thermoplastic-like performance
- ⊕ Superior strength and durability
- ⊕ Exceptional flexibility

Somos® NeXt helps you take product design to new heights with a look and feel almost indistinguishable from finished traditional thermoplastics, but with a toughness, durability and accuracy not traditionally seen in SL resins.

By using this unique SL resin, our customers produce a range of functional testing applications and prototypes that save significant amounts of time, money and materials.

Ideal for a variety of applications

Somos® NeXt helps our customers produce tougher prototype parts than those made with standard SL resins. They are ideal for a variety of applications including:

- Automotive Housings
- Electronic Covers
- Snap-Fit Design
- Sporting Goods

Solutions for many industries

Regardless of what industry you're in, new product developers rely on high-performance prototypes to test their design concepts. As a world leader in stereolithography material innovation, DSM has a Somos® solution for just about any industry. Somos® NeXt helps our customers produce tougher prototype parts than those made with standard SL resins. It is perfect for:

Aerospace

Automotive

Consumer Goods

Design

Industrial

Motorsports

Why Somos® Materials?

DSM is a global stereolithography materials provider committed to helping our clients design whatever their imaginations can create. Through collaborative partnerships and groundbreaking materials innovation, we're pushing the boundaries of possibilities to deliver brighter lives for generations to come.

Since the late 1980s, DSM's Somos® group has earned a global reputation for stereolithography material innovation. Prototypes made from Somos® resins closely replicate the functionality of engineered thermoplastics, but are delivered with increased speed and accuracy.

We are continually advancing the performance benefits of our extensive line of Somos® materials. You'll find a solution for just about any stereolithography application.
