

Somos® ProtoCast 19122 Fitting the mold

Somos® ProtoCast 19122 provides the only entirely antimony-free solution to speed up the investment casting process.

- ⊕ Superior heat resistance
- ⊕ Smooth surface finishing
- ⊕ Excellent stiffness

Using stereolithography for investment casting allows designers the ultimate in design freedom with fast results.

Somos® ProtoCast 19122 from DSM offers the only completely antimony-free stereolithography material solution for investment casting - especially when working with titanium. The stereolithography process, along with the low residual ash remaining after burn-outs, creates end-use parts that are highly accurate and smooth in less time than traditional casting techniques.

Ideal for a variety of applications

Somos® ProtoCast 19122 helps our customers produce parts for investment casting. They are ideal for a variety of applications including:

- Automotive Parts
- Electronic Covers
- Consumer Products
- Castings

Solutions for many industries

Regardless of what industry you're in, new product developers rely on high-performance prototypes to test their design concepts. As a world leader in stereolithography material innovation, DSM has a Somos® solution for just about any industry. Somos® ProtoCast 19122 helps our customers produce parts that fit their needs. It is perfect for:

Aerospace

Automotive

Consumer Goods

Industrial

Motorsports

Why Somos® Materials?

DSM is a global stereolithography materials provider committed to helping our clients design whatever their imaginations can create. Through collaborative partnerships and groundbreaking materials innovation, we're pushing the boundaries of possibilities to deliver brighter lives for generations to come.

Since the late 1980s, DSM's Somos® group has earned a global reputation for stereolithography material innovation. Prototypes made from Somos® resins closely replicate the functionality of engineered thermoplastics, but are delivered with increased speed and accuracy.

We are continually advancing the performance benefits of our extensive line of Somos® materials. You'll find a solution for just about any stereolithography application.
