

Somos[®] ProtoGen 18120 Test the waters

The Somos[®] ProtoGen line was the first resin in stereolithography to demonstrate varied material properties based on machine exposure control. The result: Now you can tailor parts to fit your unique needs.

- ⊕ Excellent durability
- ⊕ Superior strength
- ⊕ Outstanding accuracy

Whether you're in the electronics, consumer products, automotive or aerospace industries, Somos[®] ProtoGen 18120 offers a translucent, ABS-like solution. It's highly accurate, as well as humidity and temperature resistant – all of which enables your testing to run more smoothly.

Ideal for a variety of applications

Somos[®] ProtoGen 18120 helps our customers produce various part properties based upon the machine exposure that fit a variety of applications including:

- Automotive Housings
- Electronic Covers
- Consumer Products
- Metal Plating Applications

Solutions for many industries

Regardless of what industry you're in, new product developers rely on high-performance prototypes to test their design concepts. As a world leader in stereolithography material innovation, DSM has a Somos[®] solution for just about any industry. Somos[®] ProtoGen 18120 helps our customers produce parts that fit their needs. It is perfect for:

Aerospace

Automotive

Consumer Goods

Design

Industrial

Motorsports

Why Somos[®] Materials?

DSM is a global stereolithography materials provider committed to helping our clients design whatever their imaginations can create. Through collaborative partnerships and groundbreaking materials innovation, we're pushing the boundaries of possibilities to deliver brighter lives for generations to come.

Since the late 1980s, DSM's Somos[®] group has earned a global reputation for stereolithography material innovation. Prototypes made from Somos[®] resins closely replicate the functionality of engineered thermoplastics, but are delivered with increased speed and accuracy.

We are continually advancing the performance benefits of our extensive line of Somos[®] materials. You'll find a solution for just about any stereolithography application.
