

A close-up photograph of a young man with dark, wavy hair, smiling and looking towards the right. A black and silver hair dryer is positioned in the foreground, blowing air towards his hair.

Somos® ProtoTherm 12120

# Turn up the heat

For the automotive and aerospace sectors, our Somos® ProtoTherm 12120 delivers high temperature resistance with exceptional surface finishing — a perfect combination for simplifying wind tunnel trials.

- ⊕ Superior heat resistance
- ⊕ Smooth surface finishing
- ⊕ Excellent stiffness

Somos® ProtoTherm 12120 is designed for the rigorous demand of high temperatures and exposure to wind tunnel testing. It will provide you with smooth, durable, red parts that will separate you from the rest of the pack and provide quicker turn-around times for testing.

## Ideal for a variety of applications

Somos® ProtoTherm 12120 helps our customers produce parts that are exposed to high heat testing and need a smooth finish. They are ideal for a variety of applications including:

- Automotive Housings
- Aerospace Components
- Consumer Products

## Solutions for many industries

Regardless of what industry you're in, new product developers rely on high-performance prototypes to test their design concepts. As a world leader in stereolithography material innovation, DSM has a Somos® solution for just about any industry. Somos® ProtoTherm 12120 helps our customers produce parts that fit their needs. It is perfect for:

Aerospace

Automotive

Consumer Goods

Industrial

Motorsports

## Why Somos® Materials?

DSM is a global stereolithography materials provider committed to helping our clients design whatever their imaginations can create. Through collaborative partnerships and groundbreaking materials innovation, we're pushing the boundaries of possibilities to deliver brighter lives for generations to come.

Since the late 1980s, DSM's Somos® group has earned a global reputation for stereolithography material innovation. Prototypes made from Somos® resins closely replicate the functionality of engineered thermoplastics, but are delivered with increased speed and accuracy.

We are continually advancing the performance benefits of our extensive line of Somos® materials. You'll find a solution for just about any stereolithography application.
